

Videonations delivers flexible, innovative, high speed Internet solutions via its collaboration with a range of specialist network carriers. Our portfolio of VidNet connectivity solutions stem from a wide reaching network that interconnects into the backbones of multiple tier 1 carriers, offering access to all legacy and cutting edge technologies.

This powerful set up enables us to create bespoke solutions with ever increasing flexibility so that even if we don't currently have a solution that meets your exact needs, we have the expertise and range of technologies to create it.

There are four VidNet flavours available depending on business size and internet requirements:

- **VidNet SME** – Video, VoIP and Data connectivity solutions for SMEs
- **VidNet Advance** - Carries extra resilience for larger businesses
- **VidNet Flow** - The ultimate solution for connectivity uptime and resilience
- **VidNet PWAN** - A private and dedicated network solution

VidNet SME 0.8 / 1.3 / 2.0 for Video & VoIP

SMEs increasingly need to communicate with remote clients and workers using Internet, VPN (Virtual Private Network) or VoIP (Voice over Internet Protocol) networks. Exploiting recent advances in technology, VidNet SME, Vidnet SME+ and Videt SME Data look to provide customers with higher quality and more reliable alternatives for such mission critical applications and services.

- Speed - up to 0.8Mb/s or 2.0 Mb/s down and upstream (synchronous)
- Contention ratio – 5:1
- Ripe static IP address assignment
- SLA
 - 99.9% service level agreement on connection uptime
 - 99.9% service level agreement on network availability
- Support - 24/7

VidNet SME+

Provides the same connectivity as VidNet SME but with a 1:1 contention ratio.

- Speed - up to 0.8Mb/s or 2.0 Mb/s down and upstream (synchronous)
- Contention ratio – 1:1
- Ripe static IP address assignment
- SLA
 - 99.9% service level agreement on connection uptime
 - 99.9% service level agreement on network availability
- Support - 24/7

VidNet SME Data

- Speed - up to 20 Mb/s downstream and up to 2.6 Mb/s upstream
- Contention ratio – 10:1
- Ripe static IP address assignment
- SLA - 99.9% service level agreement on network availability
- Support - 24/7

VidNet Advance for Video, VoIP & Data

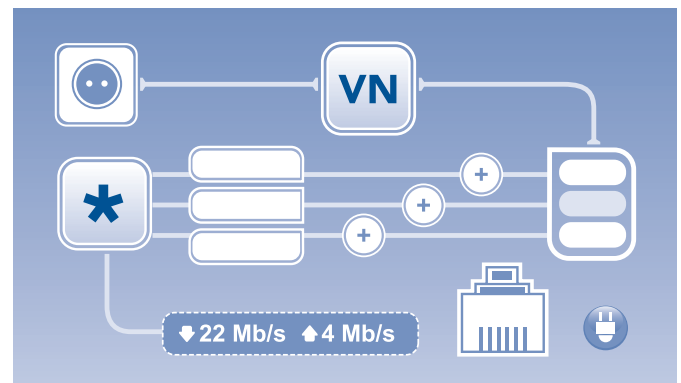

VidNet Advance offers larger businesses the extra resiliency and support they require. The system intelligently utilises a backup line while using the same IP range and has been designed to be completely autonomous meaning no interaction is required for the system to switch between either working line.

- Speed - up to 20 Mb/s downstream and up to 2.6 Mb/s upstream
- Contention ratio – 10:1 (5:1 for back up line)
- RIPE static IP address management
- SLA - 99.9% service level agreement on network availability
- Support – 24/7
- Lead time – 2 to 3 weeks

VidNet Flow for Video, VoIP & Data

VidNet Flow is the ultimate solution for connectivity uptime and resilience. The technology enables your business to blend together multiple connections so that even if one of the lines develops a fault, your IP routing remains unaffected as VidNet Flow continues over the working circuits.

- True circuit aggregation
- Maintain connectivity even if one DSL circuit suffers a fault
- IP addresses remain unchanged even if a DSL circuit fails
- Ability to use multiple wholesale carriers for increased resilience
- SLA
 - 99.9% service level agreement on connection uptime
 - 99.9% service level agreement on network availability
- Support – 24/7
- Lead time – 3 to 6 weeks

VidNet PWAN for Video, VoIP & Data

VidNet PWAN (Private Wide Area Network) allows businesses to build a genuinely private network between all their offices and remote workers across the UK and around Europe. Each VidNet PWAN that we build is a dedicated and isolated core network exclusive to the contracted business. VidNet tailors the PWAN solution to meet each exacting need to ensure reliability, security and ease of use. Core equipment within our data centre is dedicated for each customer and the whole PWAN is protected by a centralised firewall. This provides secure Internet access for the whole client network and a single point of security management which is easy to administer and support.

- Independent to connections
- No VPN tunnels to manage
- Single firewall protecting organisation
- End-to-end QoS routing options
- Collocate servers to centre of network
- Small monthly management fee
- SLA - 99.9% service level agreement on network availability
- Support – 24/7
- No minimum contract

Pricing Information

Product	Install cost	Monthly	Annual
VidNet SME 0.8 Mb/s	£380.00 Includes Cisco 857 Router	£120.00	£1,375.00
VidNet SME 2.0 Mb/s	£555.00 Includes Cisco 877-M Router	£185.00	£1,975.00
VidNet SME with PSTN 0.8 Mb/s	£480.00 Includes Cisco 857 Router	£140.00	£1,375.00
VidNet SME with PSTN 2.0 Mb/s	£675.00 Includes Cisco 877-M Router	£199.00	£2,365.00
VidNet SME+ 0.5 Mb/s SDSL leased line	£700.00 Includes Cisco 878 Router	£249.00	£2,895.00
VidNet SME+ 1.0 Mb/s SDSL leased line	£700.00 Includes Cisco 878 Router	£299.00	£3,495.00
VidNet SME+ 2.0 Mb/s SDSL leased line	£700.00 Includes Cisco 878 Router	£349.00	£3,995.00
VidNet Advance 20.0 Mb/s With .8Mb/s backup	£300	£465.00 Includes Cisco 1841 Router	£5,320.00
VidNet Flow 4 Mb/s service	£1,249.00	£630.00 Includes Cisco 1841 Router	£6,995.00
VidNet Flow 8 Mb/s service	£1,875.00	£1,375.00 Includes Cisco 1841 Router	£14,995.00
VidNet PWAN service – Multisite Core	£8,125.00	£330.00	£11,900.00
VidNet PWAN service – Cisco CSC module	£2,500		£1,495.00
